Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 10-12, 16-19, 23-24, 41-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant disclosure page 1 lines 5-24, figures 1, and 7 in view of Pourtau et al (5181357).
3. Applicant disclosure page 1 lines 5-24, figures 1, and 7, shows all the claimed limitations except for a textured surface having a plurality of protrusions thereon, the protrusion extending a distance from the textured surface, the textured surface adapted to frictionally engage the separator such that the protrusions engage the separate, the protrusion covering the entire textured surface .
4. Pourtau et al discloses the use of protrusions (2B, figure 1) such that a clip (figure 2) better engage with its attaching structure (8) as it provides for extra friction between the mating surfaces.
5. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Applicant's disclosure above to show a textured surface having a plurality of protrusions thereon, the protrusion extending a distance from the textured surface, the textured surface adapted to frictionally engage the separator such that the protrusions engage the separate, the protrusion covering the entire textured surface since it enhances the attachment of one

structure to another per the additional friction with the extra surface area as taught by Pourtau et al.

Response to Arguments

6. Applicant's arguments with respect to claims 10-12, 16-19, 23-24, 41-52 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different device with protrusions.
